How to use this book

This book is the companion to your interactive app. The app is the fastest way to train: it logs every set, remembers your weights, runs your rest timer and charts your progress. This PDF gives you the same material in a format you can read, print and fill in.

Open the interactive app:
https://ka3lql3ak-collab.github.io/DigiByDK-shop/getfitwithme/30-day-get-fit-challenge-c9×4.html
Tip: on your phone, tap Share → *Add to Home Screen* so it opens like an app.

This PDF is interactive. Tap any entry in the table of contents to jump to it, use your PDF reader's bookmarks panel to navigate, and fill in the workbook pages at the back directly in Adobe Acrobat, Apple Books/Preview, or most PDF apps. Your entries save with the file.

This program is for educational purposes and is not medical advice. Consult your doctor before starting a new exercise or nutrition plan, especially if you are pregnant, injured or have a medical condition. Stop any exercise that causes pain.

PART I

The Guide

8 chapters. Read Chapters 1–4 before you start, and use the rest as a reference.

CHAPTER 1

Welcome: How the Challenge Works

For the next 30 days, you'll complete a short daily workout, four simple daily habits and a mindset prompt. The goal isn't perfection. It's **consistency**. Thirty days of showing up rewires your habits, your energy and how you see yourself.

Your daily routine

1. **Workout (20–35 min):** circuits you can do at home or at the gym. Dumbbells optional.
2. **4 non-negotiables:** workout, 80+ oz of water, 8,000 steps, protein at every meal.
3. **Mindset prompt:** 2–5 minutes of journaling.

The weekly rhythm

DAY	FOCUS
1	Glutes
2	Upper Body
3	Core + Cardio
4	Legs
5	Full Body Burn
6	Active Recovery
7	Rest & Reset

Each week the reps increase by about 25% and rounds go up in Week 3, so the challenge grows with you. Day 29 is the **Final Boss** workout and Day 30 is **Show-Off Day**.

Before Day 1

- Take **progress photos** (front, side, back) in good lighting.
- Take **measurements** (waist, hips, glutes, thigh, arm) and log them in the Measurements tab.
- Clear a space at home or plan your gym time.

CHAPTER 2

How to Do the Circuits

Each workout is a **circuit**: do every exercise once in order with minimal rest, then rest 60 seconds and repeat for the listed number of rounds.

Timing tips

- **Reps** (e.g. "15") means complete that many controlled reps.
- **Seconds** (e.g. "30s") means work continuously for that time. Use the timer.
- **/side** means do the reps on each side.

Intensity

The last few reps of each exercise should feel challenging. If a round feels easy, slow down the lowering phase, add a pause or hold dumbbells.

CHECK YOUR UNDERSTANDING

What does "10 /side" mean?

A. 10 reps total

B. 10 reps on each side

C. 10 seconds per side

Answer: B. Do 10 reps on the left and 10 on the right.

CHAPTER 3

Scaling Every Move

Every exercise can be made easier or harder. Pick the version that challenges you while keeping good form.

EXERCISE	EASIER	HARDER
Push-ups	Hands on a bench or wall	Feet elevated, or slow 3-sec lowering
Squats	Squat to a chair	Hold a dumbbell (goblet), or pause at the bottom
Glute bridges	Shorter range	Single-leg or dumbbell on hips
Reverse lunges	Hold a wall for balance	Hold dumbbells, or step back onto a deficit
Burpees	Step back instead of jumping, no push-up	Add a tuck jump
Mountain climbers	Slow, hands on a bench	Faster pace
Squat jumps	Bodyweight squats with a calf raise	Deeper, higher jumps
Plank	On knees	Add shoulder taps
Tricep dips	Bend knees more	Feet on a chair
Donkey kicks / fire hydrants	Smaller range	Add a mini band
Leg raises	Bent knees	Slower, legs lower

Joint-friendly swaps: If jumping bothers your knees, swap squat jumps for fast bodyweight squats and burpees for squat-to-stand reaches. You'll get the same results.

CHAPTER 4

Why These 4 Habits?

1. Daily workout

Regular movement improves strength, mood, sleep and energy. A short daily habit beats an occasional long one.

2. 80+ oz of water

Good hydration improves energy, training performance and appetite control. Many people mistake thirst for hunger. Adjust upward if you're bigger, sweat a lot or live somewhere hot.

3. 8,000 steps

Daily movement (NEAT) can burn hundreds of calories more than a workout. Research links higher daily step counts to better heart health and lower mortality, with benefits continuing up to roughly 8,000–10,000 steps for most adults.

How to get your steps: a 10-minute walk after each meal, phone calls while walking, parking further away, and walking meetings.

4. Protein at every meal

Protein keeps you full, protects muscle and helps you recover from workouts. Aim for a palm-sized portion (or more) at every meal. See the protein table below.

EASY PROTEIN SOURCE	APPROX. PROTEIN
3 eggs	18 g
1 cup Greek yogurt	20–23 g
4 oz chicken breast	35 g
1 can tuna	25 g
1 scoop protein powder	20–25 g
1 cup cottage cheese	26 g

CHECK YOUR UNDERSTANDING

Which of these can burn more calories over a day than a typical workout?

A. Daily steps and movement (NEAT)

B. Stretching

C. Drinking cold water

Answer: A. NEAT (steps, chores, standing) adds up to a large share of daily energy burn.

CHAPTER 5

Mindset & Consistency

Identity beats motivation

Motivation comes and goes. Instead of "I'm trying to work out", think "**I'm someone who moves every day**". Each completed day is a vote for that identity.

Never miss twice

You will have a bad day. That's normal. The rule: **never miss two days in a row**. One missed day is an accident. Two is the start of a new habit.

Track your wins

Check off every habit in the tracker. Watching your streak grow makes you want to protect it.

Use the journal prompts

Writing turns vague feelings into clear insight. Spend at least 2 minutes on each prompt, especially on hard days.

CHECK YOUR UNDERSTANDING

You missed yesterday's workout. What's the rule?

A. Start the challenge over

B. Never miss twice: get back on track today

C. Do two workouts today to make up for it

Answer: B. One missed day is an accident. Getting straight back on track is what keeps the habit alive.

CHAPTER 6

What to Expect Week by Week

WEEK	WHAT USUALLY HAPPENS
1	Excitement, some soreness, workouts feel challenging. Water weight may go up from new training
2	Motivation dips. This is the most important week. Lean on your "why" from Day 1
3	Workouts feel easier even though they're harder. Energy and sleep improve
4	Clothes fit differently, confidence is up and habits feel automatic

CHAPTER 7

Rest, Recovery & Soreness

- **Active Recovery days:** keep moving gently. Walking and stretching speed recovery.
- **Rest & Reset days:** real rest, plus meal prep and your weekly photo.
- **Soreness:** normal in Week 1. Gentle movement helps. Sharp or joint pain means stop and modify.
- **Sleep:** aim for 7–9 hours. It's when your body recovers and adapts.

CHAPTER 8

After Day 30

1. Compare your Day 1 and Day 30 photos and measurements side by side.
2. Celebrate. Seriously. Plan something special.
3. Choose your next step:
    - **Ready for the gym?** The Gym Girl Confidence Kit gets you comfortable in the weight room.
    - **Want glute results?** The Glute Specialist Program is my signature 8-week plan.
    - **Want to dial in nutrition?** Fuel Like A Baddie gives you macros, meal plans and recipes.
